REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-5 is the inclusion of a controller for determining whether it is time to drive the heater for heating the fusing roller of the fusing unit, where in the time to drive the heater is based on at least a time when a sheet of printing paper is fed by the paper feeding part, and driving the heater when it is time to drive the heater. This is found in all of claims 1-5, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 6-16 is the inclusion of a method of determining whether it is a heater driving-start time to drive a heater for heating a fusing roller of a fusing unit, the heater driving-start time being based on at least a time when a sheet of printing paper is fed by a paper feeding part. This is found in all of claims 6-16, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 17 and 18 is the inclusion of a method of determining whether it is a heater driving-start time to drive a heater for heating a fusing roller of a fusing unit when a sheet of printing paper is fed by a paper feeding part; and calculating a heater driving time t_h according to at least one factor selected from a target surface temperature T_t for the fusing roller previously determined at a temperature required in fusing, a surface temperature T_{mp} of the fusing roller detected by a sensor part, and a changeable slope a of the surface temperature T_{mp} of the fusing roller, when it is determined that it is the heater driving-start time. found in all of claims 17 and 18, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
